

## Open Source License Information

### Overview

ION Networks, Inc. (“ION”) uses open source software in selected products. Where ION has modified open source packages licensed under the GNU Public License (GPL), we are required to make this code available to ION customers under the terms of the license.

The purpose of this document is to provide a list of open source packages currently utilized and/or modified by ION, as well as provide information for how ION customers may request a copy of the GPL source code present in the product(s) they own.
